RACING INSTRUCTIONS

- Speed of the bike is controlled by the hand controller trigger. The more you squeeze the trigger the faster the bike will go.
- Slow down for the bends by releasing the trigger.
- If the bike is going too fast on the bend it will fly off the track.

SAFETY NOTES

- This product is not suitable for children under 3 years of age because of small parts which can present a choking hazard. Some components have functional sharp points and edges handle with care.
- This product is intended for indoor use only.
- The transformer is not a toy. It is a "Transformer for Toys". Before use, check that the transformer is the correct voltage for your mains electricity supply. This set is only to be used with the recommended transformer. The transformer should be examined regularly for damage to the casing, plug pins and cables. In the event of such damage, the set should not be used until the transformer is replaced with a new Hornby recommended unit. Never attempt to open the transformer yourself.
- This set must not be connected to more than the recommended number of power supplies. The output terminals of the transformer must not be connected directly, or indirectly, to the output of any other AC circuit derived from a transformer or mains power supply.
- Use only as indicated in the instructions. Do not modify or change any part of the set. Modification may damage the set and will invalidate the warranty claim. Use only genuine Scalextric spares and accessories available from your retailer or www.scalextric.com.
- When new, hand controllers may become warm, emit vapour and give off a slight smell. These effects are normal due to the protective coating on internal parts and will disappear after use. However, they may return if the trigger is held continuously in a fixed position while racing.
- Before cleaning any part, disconnect the transformer from the mains electricity supply.
 Do not use liquid for cleaning.
- Please retain these details and the address for future reference.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

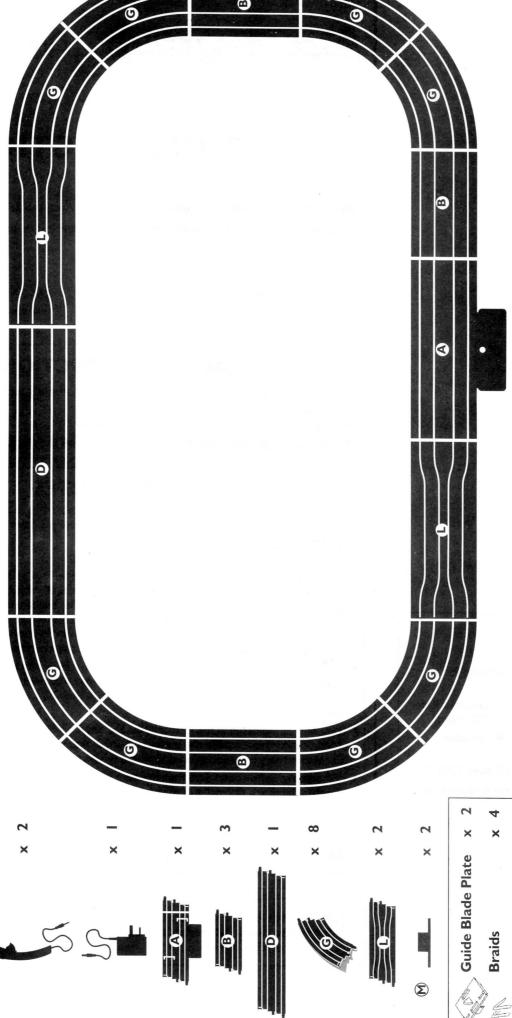

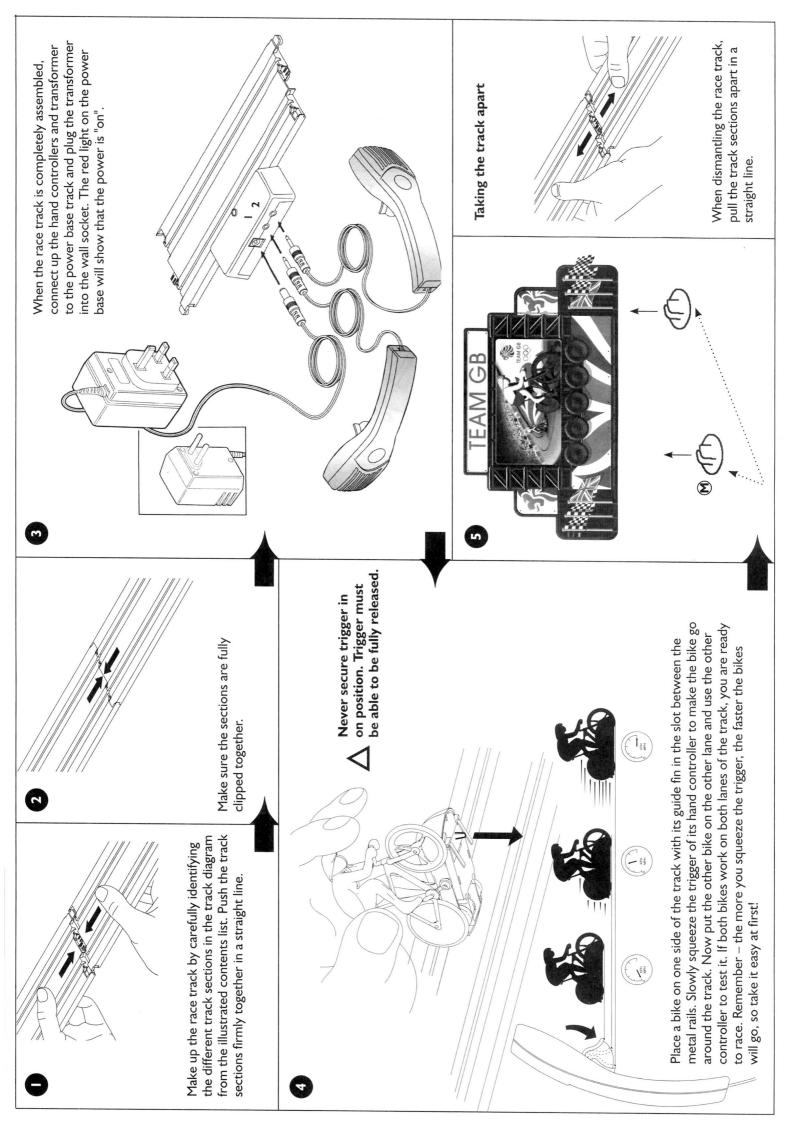

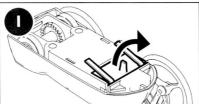

FAULT FINDING

- Body comes off after crash refit by lining up the clips on the body and chassis and push to close.
- need cleaning or bending out towards the track or changing, see overleaf. Bikes do not run – the braids may

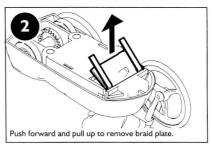

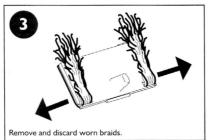

CHANGING THE BRAIDS & CHASSIS MAINTENANCE

After a while, the pick-up braids underneath the bike may become worn out and need replacing. To do this, turn the bike over and unclip the flap from the chassis.

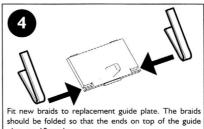

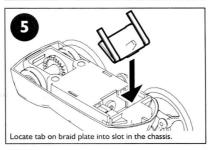

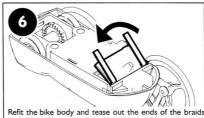

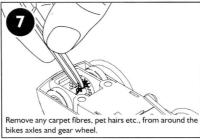

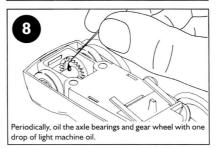

plate are 10mm long.

Refit the bike body and tease out the ends of the braid so they make good contact with the pick-up rails in the

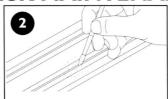

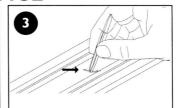

TRACK MAINTENANCE

Always keep track clean by wiping over with a non-fluffy cloth, especially before putting the set away. Keep the pick-up rails shiny by rubbing carefully with a nylon "Scotch" washing-up pad or track cleaning rubber, reference R8087, obtainable from Hornby stockists.

Keep the slot between the pickup rails free from anything which would prevent the guide fin from travelling along it freely.

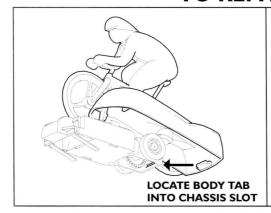

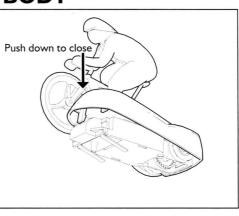

Make sure anything made of metal does not bridge the two pick-up rails which would cause a short-circuit.

If a short-circuit does occur, the automatic cut-out in the transformer will come into operation and shut off power to the track. In this case, unplug the transformer from the wall socket, eliminate the reason for the short-circuit and plug the transformer back in again. Note: The transformer must remain unplugged for at least 45 seconds to allow the cut-out to reset itself.

HORNBY SERVICE WARRANTY

Hornby products are guaranteed against defects in materials or workmanship for a period of six months from purchase.

If any such defect occurs during the period of warranty, please contact a Scalextric dealer for assistance. A full list of service dealers can be found on www.SCALEXTRIC.com

Alternatively, the product (or component), may be forwarded to Hornby Hobbies Limited, carefully packed, with a note enclosed giving full details to:

Repairs Department, Hornby Hobbies Limited, Westwood, MARGATE, Kent CT9 4JX The product will be repaired or replaced, free of charge, if the problem is found to be due to either workmanship or materials.

This warranty is valid for products purchased in the United Kingdom and is in addition to, and does not diminish, your statutory rights.
